Template: Warcraft

Ravenswood / June 17, 2009 08:24AM

[Template: Warcraft](#)

This template is called "Warcraft". Believe it or not, my wife and I don't actually play WoW, but we know several people who do, which is what inspired us to create a theme centered around it. Although, from what we have seen of it, we are sure we would enjoy playing it and quickly get addicted!

This template features a number of alternate header graphics. Unfortunately, this causes the resultant zip file to go above the 500K max for uploading here. I am linking to the file on our server for download. If one of the mods wants to edit my post and add it, please feel free to.

The file can be downloaded from [this link](#).

This template is for Phorum 5.2.

To see a live preview, click [here](#).

This template includes 7 different header graphics which can be used with this template. To see the headers, click [here](#).

Template: Warcraft

["When given a choice, always choose monkeys."](#)

Ravenswood / July 14, 2009 01:12PM

[Re: Template: Warcraft](#)

Version 1.3

Template has been updated to provide built-in support for the following modules:

- * User Avatar
- * User List
- * New Message Icon
- * (Built-in support for the Announcements module was already present in previous versions.)

Minor tweaks.

The file can be downloaded from [here](#).

[Re: Template: Warcraft](#)

Hello,

I downloaded and installed your Warcraft template - very nice for my needs. I just want to change the link hover color from the reddish/orange and I cannot seem to find it!

I've modified lots of css before and I just cannot figure this one out... any suggestions?

thank you!

[Re: Template: Warcraft](#)

In the "settings.tpl" file, look for this line:

```
{VAR link_hover_color "#ff4040"}
```

Change that to the color you want.

[Re: Template: Warcraft](#)

OOOOOOH that was it. Thank you so much for your prompt reply!
Your templates are really great and so easy to use.

[Re: Template: Warcraft](#)

Hello,

could you help me again? I want to change the size of this text that I've highlighted.

I can't figure it out!!

THANK YOU!

I can't figure it out!!

I suggest you install firebug or web developer extension for firefox. Then you just hover over the items and magically see what css rules they use. Then finding them becomes much easier.

[Re: Template: Warcraft](#)

I'm sorry. I thought I answered this several days ago... but I don't see my post here, so I guess I didn't.

In css.tpl, look for these lines:

```
#phorum table.list td p {
    margin: 4px 8px 16px 4px;
}

#phorum table.list td .h3 {
    margin: 0;
}
```

Add-in settings for font size, like this:

```
#phorum table.list td p {
    margin: 4px 8px 16px 4px;
    font-size: 10px;
}

#phorum table.list td .h3 {
    margin: 0;
    font-size: 14px;
}
```

Now you can set them to what you want.

[Re: Template: Warcraft](#)

Try a darker brown and not totally black ;)

mgavaldon / October 11, 2009 03:40PM

[Re: Template: Warcraft](#)

Thank you so much - this is exactly what I needed!
I'm all set now - no more stupid questions.

I tried the Firebug thing, I've never used it before - so thank you for turning me on to that too.
