[I can't view phorum as a guest...](#)

Dear my supporters,

I'm a newbie and I have just used Phorum recently, and got a problem as follow :

- I 've already created a database (hiring the host...)

- I finished config the Phorum 5.2 as the manual said but when i view the forum , it always ask for the username & password of the database

(pls go in : www.mtpacking.vn/forum/index.php for reviewing)

pls give me some advices,

Thank you very much.

TMai (from VietNam)

[Re: I can't view phorum as a guest...](#)

When I look at your forum right now, I see a working Phorum installation. If there were a database username/password issue, then it would show up on every request, but instead I see the index and a few forums.

Did you manage to solve the issue own your own already?

[Re: I can't view phorum as a guest...](#)

Thank you Mr Makaay,

I've already solved the problem (because of writting prohibited in folder cache).

By the way, i've got another problem : Can't attach an attachment .

The message

"Image error

Running getimagesize() on the image data failed
open image URL"

comes out whenever trying to attach a file (bitmap, doc...)

All the files size are zero

I've installed modules Embed Attachments (version 1.0.1) and Embed Images (version 1.0.8) as well

Pls, see what you can help and give me some advices

Thank you very much
