[rss feed with topic name](#)

hi - i am running version 5.1.25 of phorum.. how can i get the rss feed to carry the name of the topic instead of the title of the post?

please help.

[Re: rss feed with topic name](#)

If you are talking about an RSS feed that includes the replies (that's the only situation for which I can match your question), then the simple answer is: you can't. The feed shows the subject that was entered in the message.

If you need it to be different, then the only possible way is to hack include/feed.php to your needs.
