[archive forums](#)

Is there a way to aechive old forums in a seperate area or is only way to make them READ ONLY? I'd rather archive then delete old forums

[Re: archive forums](#)

What's the purpose of archiving? If its only to make them read-only, then yes, just set that permission.

[Re: archive forums](#)

Trying to seperate the list of Read Only forums from the active forums to make it easier for folks to find. So seeing if there is some sort of way to do that?

[Re: archive forums](#)

Create a folder "Archive" or "Read only forums" and move your forums there - and make them read-only.

[Re: archive forums](#)

OK sorry to bother but can I create this folder in Admin or does it have to be done on the host side?

[Re: archive forums](#)

No, just in the phorum admin.
