How does the Module List Wiki get updated?

sheik / October 17, 2012 01:39PM

[How does the Module List Wiki get updated?](#)

I tried editing the Wiki but see that the module list is now autogenerated via [www.phorum.org]
What do I need to do in order that my modules get added to this list please?

Cheers,

Adam

[Re: How does the Module List Wiki get updated?](#)

Thanks.

Where does it pull the module "short description" from?

[Re: How does the Module List Wiki get updated?](#)

Does it pull that from the uploaded zip? Pretty cool if it does...

[Re: How does the Module List Wiki get updated?](#)

Sorry, one more question. How do you specify a category for a module? One of mine is in Unclassified and it should ideally be under Spam Prevention.

Thanks,

^adam

[Re: How does the Module List Wiki get updated?](#)

As written on top of the module list:

Quote

Categories can be added to info.txt as

category: shortname of category as shown below

Multiple categories are possible. Just add them as multiple lines.
