[BBCode - WYSIWYG-editor using TinyMCE](#)

I hacked together this mod some weeks ago and even though I don't think that its finished I'd like to post it here. Thats why I call it version 0.1 and "Preview" ;).

Once enabled it adds a small link to the post-form which enables the wysiwyg editor with some selected options for Firefox and Internet Explorer with JS enabled.

I also added the spellchecker plugin which uses the Google-Webservice for spell-checking (guess it needs either curl or external socket connections to do this).

As the archive is 603kB I uploaded it externally.

You can download the module there:

[\[projekte.mysnip.de\]](http://projekte.mysnip.de)

Here is the readme-part:

Quote

Module : Phorum TinyMCE-Editor (Preview)

Version : 0.1

Author : Thomas Seifert <thomas@phorum.org>

This module will add a button to toggle the tinymce wysiwyg editor in the posting-form to add bbcode in a visual way.

Install:

- Unpack the archive;
- Move the directory "tinymce_editor" to the directory "mods" within your Phorum installation;
- Login as administrator in Phorum's administrative interface and go to the "Modules" section;
- Enable the module "TinyMCE WYSIWYG Editor".
- Enable the "BBcode" module

TinyMCE

TinyMCE is a complete js-based wysiwyg-editor for most used browsers.

Its written by Moxiecode Systems AB and can be found at

[\[tinymce.moxiecode.com\]](http://tinymce.moxiecode.com)

Its released under the LGPL license.

This integration is based on the previous bbcode-integration for PunBB found in

[\[tinymce.moxiecode.com\]](http://tinymce.moxiecode.com) .

[Re: BBCode - WYSIWYG-editor using TinyMCE](#)

I have just upgraded to 5.1.23, disabled the Editor Tools module and installed the new TinyMCE module.

As soon as I load the posting.php I get a Javascript error: "Line 1013. Error: Object doesn't support this property or method".

When I click "Toggle WYSIWYG-Editor" I get a Javascript error: "Line 1: Error: 'invalid_elements' is null or not an object."

I have BBCode enabled, but tried disabling and reenabling it to no effect.

Hope this is helpful, I'd love to see the working module!

[Re: BBCode - WYSIWYG-editor using TinyMCE](#)

No problem, I just wanted to report that I'd tried it.

Maurice, do you have it running alongside Editor Tools?

Also, I'm curious to know whether your [center] tags work? They were what caused me problems (especially when used around images) when I tried to get TinyMCE's BBCode module to work.

[Re: BBCode - WYSIWYG-editor using TinyMCE](#)

They work along fine, but there's not really something to work along, because they do very different things. I had some changes to make things work, but I am afraid I did something stupid. I have a dev and a live site. On the dev site, I had a working editor, but I synced my live site to the dev site for implementing the latest 5.2-dev code in my site software. That deleted the test setup of this module, so currently I have no working code anymore :-)

gosh how stupid :-/

[Re: BBCode - WYSIWYG-editor using TinyMCE](#)

@ Maurice: Ouch!

@ Thomas: do you have a link I can see the module running on (I won't post anything to a live site) - thanks!

[Re: BBCode - WYSIWYG-editor using TinyMCE](#)

Sure, you can try it here [phorumdev.mysnip.de]

Just a development version. Post at will :).

[Re: BBCode - WYSIWYG-editor using TinyMCE](#)

Thanks Thomas - it looks great!

As I suspected though, the [center] tag doesn't seem to work. I tried hacking in a fix on my prototype module, but

it never worked correctly with other tags such as images.

[Re: BBCode - WYSIWYG-editor using TinyMCE](#)

Very nice!

will this be available soon?

Thanks

[Re: BBCode - WYSIWYG-editor using TinyMCE](#)

i am not able to download this modulle

Thomas Seifert / March 22, 2010 07:57AM

[Re: BBCode - WYSIWYG-editor using TinyMCE](#)

And as it was for phorum 5.1 and didn't work correctly on 5.2 I won't reenale its download.

TinyMCE alone is available at [\[tinymce.moxiecode.com\]](#) if you want to take a whack at it.

[Re: BBCode - WYSIWYG-editor using TinyMCE](#)

any chance this module might get revived?

Thomas Seifert / May 01, 2010 02:59AM

[Re: BBCode - WYSIWYG-editor using TinyMCE](#)

I have no plans for that right now.
