UTF-8 for phorum 5.0.16

frantisek.sidak / July 12, 2005 08:56PM

[UTF-8 for phorum 5.0.16](#)

Ěština v UTF-8 a další neoficiální záplaty pro phorum ke zprovoznění fóra s kódováním UTF-8. Původní soubory přepište soubory z archívu.

=====

There are some changes, which helps me to run phorum 5.0.16 with Czech in UTF-8.

Mailing in UTF-8

No mistakes in page and forum title

Possible to set up MySQL charset (need MySQL 4.1+)

Include czech.php language file also (for example)

After forum installation rewrite original files by these (in attachment)

[Re: UTF-8 for phorum 5.0.16](#)

sorry, i found replies by myself

///is it possible to use variable also into header.php?

///(than probably directly by first '<?php?')

do not need use variable (does not use language files),

maybe can use simple english instead of utf8

///isn't more 'nice' declare english.php like utf8 too?

///(needs change nothing in rest of english file, right?)

///(generally no problems with different charset in language file and database?)

can have different interface and database

generally config.php/webside_charset is that what phorum needs

///looking in slovak.php from [[phorum.org](#)]

///it contains

```
/// $PHORUM["DATA"]['LANG_META']='<meta http-equiv="Content-Type" content="text/html; charset=windows-1250">';
```

needs replace it by

```
$PHORUM['charset']="windows-1250"
```
