Norwegian translation

[Norwegian translation](#)

Is there a reasonably current Norwegian translation for the Phorum software? I'm using Phorum 3.x on my website [solumslekt.org] and have been using a slightly modified Norwegian language file for that, but now I want to upgrade to 5.0.18.

I have been looking at the Danish translation and it looks quite good, so I might do a quick job and make a Norwegian one based on it. But if anybody else have a Norwegian file at hand, I'd like to know.

regards, Leif

Is it supposed to be Bokmål or Nynorsk?

[Re: Norwegian translation](#)

It's Bokmål. That's what 75-80% of us Norwegians prefer.
