[Online Users Module translation help](#)

Hi guys. You do a great job, although I don't speak any of these languages. :)

I'm releasing the first localized version of the Online users module, so that it can be used by everybody and not just English installations. The trouble is that I can't translate it, and I would like to include more languages than English.

I've attached the language file for it here, if anybody would be willing to translate it, I would be extremely grateful.

Its pretty short, so it should not take you very long. Just change the "translator:" line to yourself and make the necessary changes, then attach the new version here. I will include them in the module download as I get them.

Thanks!
