Add more details in the profiles

sif4ever / June 01, 2005 01:13PM

[Add more details in the profiles](#)

Hi there

I have made a script, where the users can add more details about them self in the users profiles.

The fields I have made is:

- MSN
- Skype
- ICQ
- About Me

You can use my script to get this in the users profiles.

You have to do this.

1) Download the script. Upload all 4 files to your template dir. (ex /templates/XXXX/)

2) Insert this linie in your language fil:

"Aboutme" => "About me",

The language files are at include/lang/XXXX.php

3) Goto admin.php

Click on "Custom Profiles"

Insert this 4 values (one by one)

MSN

ICQ

Om_Mig

Skype

Now yours users can insert and edit the details.

Best regards

Jesper

[Re: Add more details in the profiles](#)

You can see the last online time in the script.
