[It's about avatar and so....](#)

Hi cheers.

I really like phorum, and thanks all of you, who work on it, spend time and energy.

One of the stuff I would like to have in phorum, is the fun coming from avatar, and so.

Also, I looked around, and started to make it, with the easier way I founded.

Some template editing and here is the result :

In her/his profile, an user can put the url adress for her/his avatar, and it will be showed up on the profil page, [like this](#).

It work simply, but fine in the profil panel (if we dont count the fact than my {LANG->avatar} and so dosent work...), but in the message list, it dosent work. I dont know how to take the user informations... maybe some one can help me ?

That's what I have done in the read.tpl to take info.

```
<p><strong>{MESSAGES->linked_author}</strong><br />
{IF PROFILE->real_name}
<br />aka&nbsp;{PROFILE->real_name}
{/IF}</p>
{IF PROFILE->avatar}
<p align="center"></p>
{ELSE}No&nbsp;Avatar&nbsp;Selected
{/IF}
<p>
{IF PROFILE->date_added}
Member&nbsp;since:&nbsp;{PROFILE->date_added}<br />
{/IF}
{IF PROFILE->total_post}
Post:&nbsp;{PROFILE->total_post}<br />
{/IF}
{IF PROFILE->location}
Location:&nbsp;{PROFILE->location}<br />
{/IF}
{IF PROFILE->small_text}
About&nbsp;me{PROFILE->small_text}<br />
{/IF}
</p>
```

But no info are taked, and nothing eept username from poster are viewed...

So here are my few questions :

1. How making working my {LANG->avatar} ?
2. How can I make my own {LANG->avatar} are they listed somewhere ?
3. How can I get the info (like date\_added, location, and so) from read.tpl ?

Many many thanks in advance.

---

With kind regards, Mark W. K.

> 1. How making working my {LANG->avatar} ?

put it in the language-file like the other language-vars

> 3. How can I get the info (like date\_added, location, and so) from read.tpl ?

its nearly the same like this one:

[\[phorum.org\]](http://phorum.org)

[Re: It's about Seifer](#)

Oh,

its Seifer ! Sorry that I called you Thomas all along. Whats your Surname? "Ein" ;-)

pat

[Re: It's about Seifer](#)

Grrr Pat, ;)

Thomas = First Name

Seifert = Surname
