Limit size of displayed url in bbcode

leafred / September 10, 2004 05:51AM

[Limit size of displayed url in bbcode](#)

It's just a little hack in "bbcode" module to limit those giant urls

just put it, in mods/bbcode

choose the size in "\$maxurlen" at the beginning of the script

that's all.

[Re: Limit size of displayed url in bbcode](#)

oops, i forgot ...

The url is still valid, just the url "view" is limited.
