[Is there an Admin User Guide?](#)

Hi, I have just installed phorum v3 for a client (had to use this v3 as his hosting company are still on old versions of PHP etc.). All went well for me and all is working ok.

The client, who is not very computer literate, is now asking for an admin user guide.  
Does such a thing exist?

Thanks  
Terry

No, there isn't ... as far as I know.
