[No Attachements Interface in Theads](#)

I have properly changed the settings for attachements in the admin, but there is nothing in the treads interface which allows me to attach files. I am using 3.4.8a. What am I missing?

[Re: No Attachements Interface in Theads](#)

Yes, I allow two. I set the size limit to 2000, shwo attachements as "links" I made a directory for saving and gave a path. It does not complain. What else should I do?

[Re: No Attachements Interface in Theads](#)

did you also allow some extensions?  
also there are general settings \*and\* settings for the forum.

[Re: No Attachements Interface in Theads](#)

Yes, I allow the following extensions gif;jpg;bmp;doc;pdf;php;csv. I do not know what you mean by \*and\* settings. I used "attachement settings" in the "phorum setup".

[Re: No Attachements Interface in Theads](#)

there is also a setting for each forum alone. not only the general settings.
