QUOTE tag not indicated on email notifications

[QUOTE tag not indicated on email notifications](#)

When using the QUOTE tag, like for example:

Quote

this is a quote

the e-mail notifications don't show that something was quoted, so it makes the email very confusing.

I would just like to request that it would be nice if the emails would indicate which parts of the message are quotes. I've seen other forums' email notifications to show it like this:

-----QUOTE-----

this is the quoted text

-----QUOTE-----

I don't know which mod this would be applicable to, so I just posted it here.

Thanks!

Judith
