[how to show 10 newest post outside forums directory](#)

Hi,

How to show 10 newest post outside forums directory ?

Thanks.

[Re: how to show 10 newest post outside forums directory](#)

You can parse the RSS data provided by calling the code feed.php at the root of your phorum installation. The simplest ways to access the RSS is to enter
yourdomain/feed.php?0,type=rss

There exist many RSS parsers that you can use.
