[What you see, what you Thread](#)

Hi,

First thank you for this marvelous forum.

I have a question about a very nice templates model (version3) that I cannot find for instant in the 5 version, here an example :

[\[forum.web1.fr\]](#)

You can see all the thread with ASCII codes, very usefull when the discuss is very long with a lot of answers !

Please tell me if anybody know if these templates are style available ? if someone know where I can uploading these templates or if I have to develop teh code ?

(I'm french and sorry for my poor english)

Thank You !

Bruno.
