posting.php and index.php custom changes

obelix / December 19, 2011 03:22PM

[posting.php and index.php custom changes](#)

Where do I add to or modify the message "Sorry, only registered users may post in this forum" in posting.php?

Also is it possible to insert a logo in index.php next to the Phorum Title, above the Phorum Description as edited in General Settings?

Thank you.

I don't know what you really mean.

You can change all texts in the language file. Default is include/lang/english.php.

And you can add anything you like in the templates, e.g. in header.tpl.

english.php is what I was looking for. I tried to add a logo in header.tpl but it kinda screwed up the whole page. The page came out unformatted without any colors, just white and text in blue or black..... But i'll try again. Thank you.
