[icons](#)

I have put icons in the nav bar of phorum,  
have a look: [\[www.phpforums.net\]](http://www.phpforums.net)  
and download the add-on called IconPhorum  
(in french or in english)  
if you like it !

and please excuse my poor english ;)

[Re: icons](#)

I cannot find the "value="\$!Search" string in my search.php...

Please help I like the layout of your icons and would like to use them.

Thanks,

---

[Re: icons](#)

I am sorry, the string to find in search.php is

```
value="<?PHP echo $!Search;?>"
```

and you replace " <?PHP echo \$!Search;?>" with "Search" or "TheWordYouWantOnTheButton" J

Sorry again for the bug

Marc

[Re: icons](#)

Excellent! Thanks for the icons. Looks great. Now if I can just get smilies working I will be all set.

[One Small Problem](#)

The "New" icon does not show up on new posts. It is looking for nouveau.gif in the /lang/icons/ folder but that file does not exist.

[Re: One Small Problem](#)

---

It's an horrible error !

You can copy it on [[www.phpforums.net](http://www.phpforums.net)] and paste in icons folder.

I have to quickly add it in IconPhorum !

[Re: smilies](#)

The smilies are not mine, you can download EasySmiley there:

[[www.phpscripts-fr.net](http://www.phpscripts-fr.net)]

[Re: smilies](#)

Thanks Marc! Just one question... Do you have the readme file in english? I knew I should have taken French in school :)
