[OK, How do I use &quot;plug-in&quot;](#)

I have read alot of old posts about using smilies with the "plug-in" and quite a few references to a post that must no longer exist. Where, oh where are instructions on how to 1. utilize the "plug-in" and 2. how to create smilies. It would also be great if the guy who had the cool folders ( hot topics and stuff) to divulge his secret on how to achieve these effects....

Thanks for any assistance.

[Re: OK, How do I use](#)

dffdg ?

does it means something?

let me know...

[Re: OK, How do I use](#)

hey what is this for a stupid answer. please take it serious.

the posting before was a good question.

thanks

[Re: OK, How do I use &quot;plug-in&quot;](#)

I think this is the thing you want. I got it working on a forum I run in about 15-20 minutes. it's not too bad, and has an install script.
