you integrated nuke and Phorum?

how did it go? what did you have to do to get the working together? are you using one or two user tables between them?

[Web Designer-PHP-Nuke Proboards-Redesign site](#)

I am looking for someone to PHP Nuke, add a proboards message boards and recenter my site. I can't currently do it, but if you can I'll pay upto \$70. Check out my site and let me know.
