[Header Image Position](#)

Hi:

Header image on forum index is at the top. Selecting individual forum, the header is way down. Opening message dialog and the header image is at the top.

In attached example (Phorum only allows 1 attachment????) the header image is pushed down. Adding messages pushes the header image up.

Checked using Firebug and position is bottom. Checked css.php and css.tpl and no indication of source of problem,

Any help appreciated.

Robert

[Re: Header Image Position](#)

At a guess...

The template has a leftsidebar that is taller than the data/stuff in "second column" on the right will fill, and it is vertically centering. You state this goes away when you add topics (which adds data/stuff to the second column).

Test on an unmodified "bitmapworld" template to see if it has the same issues in the same places.

The bread-crumbs navigation links have issues.

Repeated links, and an extraneous > which may show as & gt without the space in source code.

The template chosen has no official support, the author has not had a presence here for several years. You already asked about this issue in another topic. Please don't post multiple topics about the same problem, thanks.

[Re: Header Image Position](#)

I thought I posted before but could not find it.

Sorry. Thanks and best regards

Robert.

I thought I posted before but could not find it.

Yes, you did: [[www.phorum.org](http://www.phorum.org)]

And I answered.

Regards

Oliver

[Re: Header Image Position](#)

Sorry. I just searched my email and could not find a link though I obviously was aware.

Best regards
