[PHP 7.1.26 Backend Problem Admin Menu](#)

Hi,  
i got some problems running phorum (5.2.23) on PHP 7.1. .  
The adminpages "Forums - Create Forum", "Forums - Create Folder", "Forums - Default Settings" ,editing an existing forum and "Manage Language Files" do not load. The Page stays white (i still can see the navigation, but no forms to change anything).

So what can i do?

I can't go back to a lower PHP-Version because my IT-Center doesn't allow it. But i know it worked with lower version...

Thanks for ur help

Thorsten

Hi Thorsten,

white page means PHP errors. Please have a look into your webserver log file.

Oliver

Hi,  
thanks!  
There was an error in the german language file.  
Now, it works!

Have a nice day!
