Forum disapears

---

[Forum disapears](#)

Maybe I should post this somewhere else, if so I apologize in advance.

When I activate the latexrender module or the bbcode\_video module, the forum just disapears. I get a blank page. When I turn the module off form the admin interface, everything works again.

What did I miss ? (I did set permissions on the directories that latex needs)

TIA

Volny

[Re: Forum disapears](#)

What version of Phorum?

What version of php is being used?

New install?

Any modifications to the phorum code, or integration with other pages on your website?

Forum disappears

---

Phorum has issues with php7.x+ as you have experienced.

The particular issues vary a little bit by operating system, host server, etc.

The mods you are using have not been updated for longer than the main phorum software.

For instance: (version 1.0.10) video mod has http: , instead of https: , hard coded in it. It will not work without modification for any of the commercial (youtube, etc.) sites.

Go to this link [[www.phorum.org](http://www.phorum.org)] and download the latest dated (2016) BBcode video.php

Then read the messages on page 9 of this topic.

[[www.phorum.org](http://www.phorum.org)]

[Re: Forum disappears](#)

As for the Latex mod, read the messages with that topic to start. [[www.phorum.org](http://www.phorum.org)]

[Re: Forum disappears](#)

Thanks a lot. It helped.

Yet I still can't see my videos, but I posted here in the [Video Post](#)
