[Link Underline](#)

Hello dear,

Is there anyway to remove all underline for link.

EXP: remove underline for (Last Post by name) or underline for Attach a file...

Idon't think there is in css.tpl or settings.tpl, because I removed both file in server for check it, but still of allot link shows Underline, all my life I hated Underline.

So please someone tell me how reomve it.

[Re: Link Underline](#)

don't just remove files. edit the css in css.tpl to achieve that. thats purely css styling.
