

Phorum Support Forums / 5.2 Language Files

Language: Estonian

Träm / March 29, 2008 01:09PM

[Language: Estonian](#)

UTF-8 Estonian language files for basic phorum software and bbcode, smileys, editor_tools modules. Translation uses a bit more editorial/journalism vocabulary instead of common Internet jargon. And it is not really a polished gem yet.

To install, just extract the archive to your phorum directory.

You may also want to notice, that iconv is used in phorum language file to format the dates correctly (this may not work for all systems).
