Language: Shqip (Albanian)

pbowers / November 03, 2010 08:27PM

[Language: Shqip \(Albanian\)](#)

This file (shqip.php) is not yet completed, but it is probably 98% done and 99.9% of the stuff that really matters.

I have not used the special characters (ë and ç) which means the translation is not as proper and is perhaps ambiguous in certain rare circumstances, but it's certainly usable.

I have it set up for UTF-8, but it could be used in other character sets currently since the special characters are not in use.
