Where i translate the months ?

Benny / July 03, 2011 12:26AM

[Where i translate the months ?](#)

i have been checked the language file but cant find the months, i want to translate them where can i find them?
thx!

[Re: Where i translate the months ?](#)

Those are translated by the operating system libraries, based on the locale setting from the language file. If you have a correct locale for your language in the language file, then the operating system might be missing the locale data for handling the translation. Install the correct locale or ask your hosting provider to do that for you.
