[New messages on top and rsubscription approval](#)

Hi people!

Did anyone already made modifications, so that the Phorum would show new messages on top? What I am trying to do is to make "Date" table header clickable, so that clicking "Date" would sort messages, one by one, with the newest on the top.

Also, did anyone made subscription approval already (so that after someone registers, he must be approved by admin, so that he can post on the forum)?
