[I DARE YOU - SHOWING MESSAGES WHIT THE TOPICS](#)

I want to show the messages that are posted in forum in the file list.php. So when someone click on a forum he/she can read the topic and the messages of the topic in the same page, whitout need to click on topic to read the messages.

I need to know:

- what sql's I have to do;
- what the files that I have to change;
- what php commands I have to put in the files to show the messages.

If anyone did this or know how to do please help me please.

[Re: I DARE YOU - SHOWING MESSAGES WHIT THE TOPICS](#)

Hey, I just finished hardening the Server here and i was wondering if someone that knows how to hack web servers can try and hack my server. most likely he won't succeed but i wont to make sure i did a good job. My site is www.parkavebmw.com As i said the site is bullet proof but you can never be too sure.
