Where does Phorum change moderators name to BOLD?

Anonymous User / April 13, 2003 12:39PM

[Where does Phorum change moderators name to BOLD?](#)

I would like to do a modification on the section where Phorum makes the author's name bold when logged in as a moderator (when seen on the list.php page). I would like to add a graphic's character to the author's name when it is a Moderator. Please tell me the following:

Where does the program tell the Author's name to go bold when logged in as Moderator?

Can I add a graphics character to the Moderator's name?

Hiya,

Have a look in include/multi_threads.php.

Line 38 (phorum 3.4.3a)

```
-----  
if(!empty($users[$topic["userid"]])){  
$author=htmlspecialchars($users[$topic["userid"]]["username"]);  
if(isset($moderators[$topic["userid"]])){  
$author="<strong>$author</strong>";  
-----
```
