[Use one phorum on deferent sites](#)

Hi all.

I want to use one phorum for 2 or more sites.

I have a couple of sites but want to have one phorum administration

My question is how i can create deferent phorum design's and use them on a diferent sites

Thanks in advance:)

ps: exuse my bad english

[Re: Use one phorum on deferent sites](#)

As long as the both / all your sites can access the same database, or are hosted in the same place, then it's easy.

Just create a new forum, enter the existing database table name, and choose "table already exists." The new forum uses the same database table as your existing forum, so all the posts are exactly the same on both.
