List new topics based on login / Mark as "New" on index.php

[List new topics based on login / Mark as "New" on index.php](#)

Is there an easy way to list the new topics based on the loggedin user instead of the cookie that gets stored? This behaviour really sucks if you need to work on different machines :-)

In addition I'd like to show a "new" on the overview page where all phorums are listed if there are new posts since the last visit (just as the topic-view does)

Any hints where to go for?

Balu

Hey, I just finished hardening the Server here and i was wondering if someone that knows how to hack webservers can try and hack my server. most likely he won't succeed but i wont to make sure i did a good job. My site is www.parkavebmw.com As i said the site is bullet proof but you can never be too sure.
