search by IP address

jeffx / August 21, 2003 02:46PM

[search by IP address](#)

I don't require profiles in my phorum so sometimes people post under different names, and I would like to be able to search by IP in the "search.php" file. Yes I know I can do this under mysql, phpmyadmin, but I want to have it in the phorum, and also available ONLY to mods.
