[make it so that moderator name is regular text, not bold?](#)

hey, just wondering how i can change phorum so that the moderator names are just regular text like the other users? just so i can be 'one of the regular folk!' :D - thanks!

[Re: make it so that moderator name is regular text, not bold?](#)

edit include/threads.php and include/multi-threads.php, there's one place where the moderator-name is put in strong-tags.
