[notify user by email/vote for a post](#)

Hi! Can anyone tell me if such features exist with Phorum?

- 1) I'd like users to be notified by email when others post on their topics.
- 2) I'd like to give users the possibility to vote for a post (agree/disagree).

Are these included with Phorum 3.4.6. Are these add-on features I have to program myself?

Thanks for your help!

[Re: notify user by email/vote for a post](#)

1. included
  2. not included

[Re: notify user by email/vote for a post](#)

Where does one indicate they want to be notified when a reply is sent to their post? Are is this something set-up in admin? Where in admin?

[Re: notify user by email/vote for a post](#)

no, just if anonymous users will see this checkbox is defined through the admin.  
for logged-in users the checkbox in the bottom is just there.

btw. but your question is a support-question and has nothing to do with mods.
