Users can enter smileys by the click

Pavel Růžička / July 29, 2001 03:13AM

[Users can enter smileys by the click](#)

This feature doesn't require active replace plugin, but without this the effect is not too great :-)

The attached file is a ZIP. Rename it to *.zip and unzip. Simply and copy (replace) unzipped files to your phorum folder.

The post form has a bar of smileys, users can add chosen smile to the post by clicking on the image.

The images are included, and settings of replace plugin included too.

Have a good fun :)

[Re: Users can enter smileys by the click](#)

i guess you need support of zip and diff files?

Pavel Růžička / July 30, 2001 09:17AM

[Re: Users can enter smileys by the click](#)

Maybe, but renaming .zip to .txt is not too terrible :)

Pavel Růžička / August 08, 2001 12:19PM

[Enhanced editor](#)

If you interested in this feature, try the DHTML editor too:

[Re: Users can enter smileys by the click](#)

Hi!

Could it be possible that there is a little bug in your smileys script? I use it and have the problem that if you do not enter a topic, the error message is displayed correctly, but the text of the message disappears. I tried it without your script and it worked fine.

Bye

Ondrej

[Re: Users can enter smileys by the click](#)

Yes there is a bug... As a matter of fact, the subject line goes blank because Phorum doesn't recognize that the reply post is a reply... so the post tree is all screwed too... I removed this hack for the time being. Hope someone can come up with a fix, my users were pretty happy with the cool smileys...

Pavel Růžička / November 15, 2001 07:41AM

[Re: Users can enter smileys by the click](#)

Simply add to the form.php this script (should be at the beginning):

Phorum 3 forums (READ ONLY) / Finished Mods and Plug-ins (READ ONLY)

Users can enter smileys by the click

[Re: Users can enter smileys by the click](#)

I can't see any attachment. Where is it. How can I get this file?

Vulpes / November 19, 2001 07:07PM

[Re: Users can enter smileys by the click](#)

<HTML>attachmets are gone for a little while, ill get them back as soon as possible.</HTML>

RH / November 30, 2001 12:20PM

[Re: Users can enter smileys by the click](#)

I also used something like that in our forum, but with ALOT more smileys. It has a bar of about 30 smileys on the bottom of the form that users can click to add a smiley, or they can click on the "click for more smileys" button to get a pop-up window with 70+ more smileys. When users click on a smiley in the pop-up window, the smiley gets added to the post and the window automatically closes.

I did not do it as a plug in, but rather I went straight into the form.php code in the include directory. The additional smileys have their own directory to make site maintenance easier.

RH.

P.S. I am still working on the attach file feature so that it allows users to add the picture as a background to post, or as a picture in post, or just as a attachment. Also, I almost have the script ready that automatically deletes a attachment from file and post after 30 days so that the server does not get congested.

[Re: Users can enter smileys by the click](#)

Thanks Pavel !

After a long struggle I found Your little file and used it.

IT WORKS, yahoo !

Greetings

nikster

[Re: Users can enter smileys by the click](#)

I found a fix for your code, I couldnt get the images to popup in the messgae window after posting.

in read.php line 450

.....Betwen.....

```
<?php echo $IDate;?>&nbsp;&nbsp;&nbsp;<?php echo $datestamp; ?><br>
```

Phorum 3 forums (READ ONLY) / Finished Mods and Plug-ins (READ ONLY)

Users can enter smileys by the click

```
<?php
```

```
>>>>$$$$ IN HERE $$$$<<<<<<
```

```
// exec read_header plugins
```

```
.....
```

add this

```
include("plugin/replace/settings.php");
```

[Re: Users can enter smileys by the click](#)

Yup, that extra line to read.php was missing.. .works like a charm now!

where can i get more smiley gifs???

camilo@cancun.com

Jesper / January 21, 2002 09:25AM

[Need help!](#)

I cant use the smileys on my forum! It is Phorum 3.3.1 and i have added that line and added the files. When you want to reply the smiley selection shows up but when the message is postet none og the smileys works ;(What should i do???????

[\[email-bogen.dk\]](mailto:email-bogen.dk)

And look under

"Smileys kan nu bruges !!!" (in danish)

Theres all the text thingies but it still does not show the smileys list!

Jesper / January 21, 2002 09:29AM

[Re: Need help!](#)

i tried to enable the replace text thingie version 0.1 then i get these errors:

```
Warning: Unable to access ./admin/settings/replace.php in /www/email-bogen.dk/web/saint/forum/plugin/replace/plugin.php on line 2
```

```
Warning: Failed opening './admin/settings/replace.php' for inclusion (include_path='') in /www/email-bogen.dk/web/saint/forum/plugin/replace/plugin.php on line 2
```

```
Warning: Cannot add header information - headers already sent by (output started at /www/email-bogen.dk/web/saint/forum/plugin/replace/plugin.php:2) in /www/email-bogen.dk/web/saint/forum/index.php on line 28
```

When i disable it again, everything works fine.

What is happening?

Users can enter smileys by the click

Jesper / January 21, 2002 10:46AM

[Re: Need help!](#)

as soon as i enable the simple text replacer v 0.1 the smileys appear but these errors also comes:

Warning: Unable to access ./admin/settings/replace.php in /www/email-bogen.dk/web/saint/forum/plugin/replace/plugin.php on line 2

Warning: Failed opening './admin/settings/replace.php' for inclusion (include_path='') in /www/email-bogen.dk/web/saint/forum/plugin/replace/plugin.php on line 2

And i can't reply or post or even visit another page! What should i do????

Jesper / January 21, 2002 11:15AM

[This might help others!](#)

If you can enable the simple text replacer v. 0.1 and the smileys shows but some errors also appear, then try to rplace just one word with another text.

I choose:

@!#\$ = ****

And now everything works! :) But i think that the crack/hack whatever should be updated so these problems doesn't appear for others...

uj / January 28, 2002 01:51PM

[can you post the updated file: please someone???](#)

can some one post the updated file.... ??

Leon / February 03, 2002 08:05AM

[Re: Users can enter smileys by the click](#)

Can you please repost the attachment? With the adjusted files?

THNX!

Aart / February 07, 2002 03:32AM

[solution for most recent version of Phorum](#)

Copy the file plugins/replace/settings.php to admin/setting/replace.php

It should be working then...

Jonas / February 16, 2002 10:48PM

[Can't use the smile](#)

One of the smile cannot be used

Frank Williams / February 25, 2002 07:40PM

[Re: Can't use the smile](#)

The entersmile.txt attachment above appears to be corrupted....

Phorum 3 forums (READ ONLY) / Finished Mods and Plug-ins (READ ONLY)

Users can enter smileys by the click

Dick / March 24, 2002 07:24PM

[Re: Can't use the smile](#)

Hi,
I installed the smileys program (entersmile.txt attachment). It works, but when I pick the icons in the editor I get the text version and not the image of the smiley. What do I need to do to fix this.
Thank You,
Dick

Ondrej / March 25, 2002 07:53AM

[Re: Can't use the smile](#)

normaly if you click on a smiley the text version IS insert into the text field. After posting the message the text version of the smiley is converted into the image. So if you look at the posting the image should be there. As far as I know there is no possibility to display an image in the input box at all.

:~)

Pavel Rùžička / April 03, 2002 10:28PM

[Re: Can't use the smile](#)

I have new version with special DHTML editor for posting HTML formatted postings. Because I must "hack" read_functions.php for show normally HTML (may case cross-scripting bug or other security errors), I dont want publish it here.

If someone interested in, should be contact me by mail or ICQ 22635022 - I will send set of needed files to him.

cyberdude / April 08, 2002 01:06PM

[Re: Can't use the smile](#)

hey u must do fast coz i have phorum verson 3.3.2a and using ur script the html is not getting compiled pls help me fast

```

Well, a
document.form1.body.value+=sm;
should do the same with less typing ;)

Users can enter smileys by the click

```
> <a tabindex='-1' href="javascript:void InsSm(':-) ') ">  
>   
> </a>
```

You could even replace (with newer browsers) replace the link with an onCLick statement for the img tag (but the above should be more compatible). I would even suggest to add Phorum-Code-Buttons like that.

Two discovered drawbacks:

The smilies are displayed even with not JavaScript available.

You have to do the synchronisation with replacement plugin manually.

Hendrik
