Icon and size of attached files

[Icon and size of attached files](#)

Hi all,

I did some basic hack on phorum 3.2.11, to display 2 things when a file is attached to a message:

- one icon next to the message line
- the file size on the message display window.

The result can be seen on my site: [\[www.cactuspro.com\]](http://www.cactuspro.com)

(French web site dedicated to cacti & succulent plants).

If this is not already in the last version of Phorum, and if you are interested in it, I can send you the needed modifications (if what I did on 3.2.11 could apply on last version of Phorum).

As my forum users are attaching only plant photos, I have only one icon. But one could design a system with different icons depending of the file type (.txt, .jpg, .png, .doc, .xml, etc.)

Yann.

[Re: Icon and size of attached files](#)

Hi!

I have sort of a similar question.

I modified the multithread.php file in order to display an icon next to the subject line whenever a moderator/admin posts a message:

```
if(!empty($users[$topic["userid"]])){
$author=$users[$topic["userid"]]["name"];
if(isset($moderators[$topic["userid"]])){
$author="<b>$author</b>";
$subject="$subject<img src=\"[www.jamie-stevens.de]\" border=\"0\" hspace=\"6\" alt=\"moderator\">";
}
} else {
$author=chop($topic["author"]);
}
```

Now I'd like to know if it's possible to display a different icon when a special user (for instant user No 3) posts a message. How to I indicate this? Any suggestions??

Thanks for your help.

JAMIE

[Re: Icon and size of attached files](#)

Yeah mate, I'd be interested in this hack, although I'm using Phorum 3.2.2a.

Please, drop me an email...

Thanks in advance,

Bumblepuppy.
