[Avatars?](#)

Is there a plug-in or a quick way to allow users to have their own Avatars?

What's the image link for anyway?

[Re: Avatars?](#)

by the way - i have done a upload script for users to upload their avatars into a server folder, images named by the user\_id.

but i don't think it's taht secure yet

perhaps somebody could work out a "perfect" avatar-upload script include for the profile page?!

[Re: Avatars?](#)

In [[ca.inf.udec.cl](#)] we implement avatar with some problem but nothing to worry about...

[Have a look at this](#)

[[phorum.org](#)]

I posted an avatar-mod there.

Works fine now (!read the hole thread!)
