[Enhanced profiles](#)

How do I remove the 50 character restriction for ICQ, MSN etc. fields in profiles menu?

I actually managed to remove the restriction to write longer descriptions, but only the first 50 characters are saved :-)

[Re: Enhanced profiles](#)

My intention is to replace those fields with some info like Age, Occupation, etc.

I also noticed, that those fields have also some other special abilities, which cause strange things :-) How do I remove those?
